

FCCDON'T STOP my service. I use XM Instant Traffic & Weather. I travel travel across the coutry and this has made driving safer for me. Rather than hunt for a local radio staion and take my eyes off the road I can push one button to get the XM Instant Traffic & Weather I need and also check up on home weather when traveling. You take this away and you take away a safty issue. I will end up hunting for local radio station for information I need. With that I take my eyes off the road just to look at the dial. Figure it out your self what could happen.

Don't take my XM Instant Traffic & Weather!!!
Don't take my XM Instant Traffic & Weather!!!
Don't take my XM Instant Traffic & Weather!!!
